Vitraul TAU on a Mac

Virtual TAU is designed to work with Internet Explorer. It will not work successfully with Safari. However, it is possible to use Virtual TAU with Firefox on a Mac if you install two firefox add-ons.

If you don't have Firefox installed, you can download it from:

http://www.getfirefox.com/

Installing Firefox Add-ons:
- Open Firefox, go to https://addons.mozilla.org/en-US/firefox/addon/748 and click 'Add to firefox'. After a few second a window will open. Click 'Install now'. After installation, Firefox will quit and reopen.
- Now go to: http://userscripts.org/scripts/show/9847 and click the install button.

Now Virtual TAU will work correctly with Firefox.
