

Be a part of an exciting project of Professor Nathan Nelson

The laboratory of Nathan Nelson in the Department of Biochemistry and Molecular Biology, Faculty of Life Sciences, Tel Aviv University, is studying the structure and function of photosynthetic reaction centers and their utilization for sustainable energy production. We use a variety of techniques including biochemistry, molecular biology as well as protein crystallization and solution of the structures.

We are looking for truly exceptional, dedicated students, who would like to make a major contribution in basic science and by so doing to solve parts of the world energy crisis. One technician and five Msc or Ph.D. positions are available.

Please submit by e-mail:

1. Letter of intent, with personal e-mail and telephone.
2. C.V.
3. B.Sc., M.Sc. or Ph.D. grades
4. Name(s) of qualified person(s) who can recommend you (e-mail; telephone)
