	.8 Course content

Being a successful scientist involves more than just doing good research. A scientific career requires many “soft skills” such as: writing, presentation, and networking. This course will provide some of these useful skills to PhD students, including guidelines and practice.

Lesson 1-2 VERBAL SKILLS: How to give and receive feedback.

How to express yourself clearly in a short time constrain (3 min talks)

How to present a poster-Guidelines.

Lesson 3: How to present a poster: poster session practice+ feedback

Useful tips for maximizing the benefit from poster sessions at conferences.

Lesson 4-7 WRITING SKILLS

How to review a manuscript: we will go over the ideas of WHY we review, how to give constructive criticism, how to make sure you are not asking for too much/too little etc. and how to actually write the review.

How to write a good academic CV. Lecture with guidelines followed by practice on how best to create an appealing and clear academic CV.

Lesson 7: To be or not to be a postdoc: Pros and cons will be discussed, as well as practical guidelines on **How to look for a postdoc and how to interview well.**
