

Statistical Learning, Spring 11  
Procedure for take home exam

1. The exam will be given out for exactly one week. There are two choices for time to take the exam:
  - (a) From 5 June at noon until 12 June at noon (last week of semester - no class because of Shavuot)
  - (b) From 19 June at noon until 26 June at noon (second week of exams)
2. The procedure for receiving and handing in the exam:
  - (a) Each student will let me know by email by 27 May when she/he wants to take the exam.
  - (b) A week before the requested starting date, I will email the rules. The student must reply that he/she understands the rules and will comply with them, before I can send the exam.
  - (c) On the requested day the grader (Aya) or I will email the exam by 12 noon.
  - (d) Exactly seven days later at 12 noon the solution is due. **ABSOLUTELY NO EXTENSIONS**. Late submission will be severely penalized.
  - (e) The primary option for submission is by email (either a computer document or scanned image). If this is impossible for you, we can arrange hard copy submissions by request.
3. The exam must be taken completely alone. Showing it or discussing it with anybody is forbidden, including (but not limited to) the other students in the course.
4. You may use any material you find, including books, the internet, etc. (You are NOT allowed to submit questions to internet discussion groups, though!).
5. Please make an effort to make your submission clear and readable. Severe readability issues may be penalized by grade.
